Summary

User Experience Engineer / Frontend Developer with 3+ years of experience building scalable React applications. Proven in delivering data-driven UI features, API integrations, performance optimization, and production issue resolution in high-traffic platforms.

Work Experience

Engineer – Software Development Xperi (TiVo) — Pune, India Oct 2024 – Present

- Designed and delivered data-driven UI modules using React, TypeScript and modular component architecture, improving feature delivery velocity by 25%.
- Optimized rendering workflows and DOM updates, improving navigation performance by 30% across browser-based platforms
- Led debugging and resolution of production defects within defined SLAs, minimizing customer-impact incidents

Associate Software Developer Xperi (TiVo) — Pune, India Jul 2023 – Oct 2024

- Engineered enhancements to video playback flows, improving stability and reducing user-facing playback interruptions.
- Investigated and resolved complex rendering, buffering, and UI crash issues across multiple Smart TV environments.
- Delivered performance-critical UI features focused on render efficiency and smooth navigation.

SDE Intern Xperi (TiVo) — Pune, India Feb 2022 – Jul 2023

- Independently delivered multiple front-end features, contributing to core Smart TV app workflows.

Projects

PilotDesk

Built an AI-powered debugging assistant using React, TypeScript, and REST APIs, automating issue triage and reducing manual debugging effort

Realtor App Demo

Developed a React-based property search app with dynamic filtering and memoized rendering to ensure smooth, performant UI interaction

Education

2019–2023 B.E. Computer Science Engineering at **Chitkara University** (GPA: 9.93)

Skills

Frontend	React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Redux
Backend	Node.js, RESTful APIs
Tools	Git, Ollama
Core Concepts	Performance Optimization, Debugging, Clean Architecture, Browser Fundamentals
